OCT 26 2005

Dkt. No.: OP-093000099

AMENDMENTS TO THE CLAIMS:

1. (Currently amended) An end-surface wick structure of a heat pipe, the heat

pipe having a pipe member and a bottom lid covering a bottom end of the pipe

member, the wick structure comprising at least one a woven mesh attached to an

internal sidewall of the [[heat]]pipe member and a sintering powder layer attached

to an internal surface of the bottom lid.

2. (Original) The wick structure as claimed in Claim 1, wherein heat pipe

comprises a top lid covering a top end of the pipe member.

3. (Original) The wick structure as claimed in Claim 2, wherein the heat pipe

further comprises a filling tube extending through the top lid.

4. (Original) The wick structure as claimed in Claim 3, wherein heat pipe

further comprises a sealing structure sealing filling tube.

5. (Original) The wick structure as claimed in Claim 2, the bottom lid is

integrally formed with the pipe member.

6. (Currently amended) The wick structure as claimed in Claim 1, wherein the

bottom lid includes a planar external surface to be in contact with a heat source

such that the heat pipe is an end surface absorbing heat pipe.

7. (Original) The wick structure as claimed in Claim 1, further comprising a

support member installed in the pipe member to press the woven mesh towards

the internal sidewall.

8. (Original) The wick structure as claimed in Claim 7, wherein the support

member includes a spiral structure.
